Option	File	Folder

Lower VRAM	`qwen_image_2.1_turbo_int8_convrot.safetensors`	`models/diffusion_models`

2. Settings

Setting	Value	Note
ComfyUI version	v0.40.0 or later	Turbo support arrived on 13 Oct 2026
Steps	8	The schedule is built into the checkpoint
CFG	1	Higher values burn the image
Scheduler	Close to `linear_quadratic`, no shift	Reported by Kijai
Manual sigma lists	Replace them if you change steps or sampler	
Output format	PNG	JPEG removes the alpha channel

3. Resolution presets

1:1	2048 × 2048
16:9	2752 × 1536
9:16	1536 × 2752

4. Troubleshooting

Problem	Fix
Burnt, over-contrasted images	Set CFG to 1
Noisy or unfinished images	Use 8 steps, or replace the manual sigma list
Model does not load	Update ComfyUI to v0.40.0 or later
Out of memory	Use the INT8 convrot file or model offloading
No transparency	Save as PNG and describe one isolated subject
